

Groups of compounds by molecular fragments that allow library selection based on the relevance of this lattice to lead discovery exploitation or diversity augmentation.

The following table indicates the appropriate number of compounds containing the designated heterocycle that are available from our stock library (2-4 week delivery).

[Download 5- and 6- Membered Heterocycles](#)

Custom template selection and grouping is available

Compound	Types By Heterocycle Template
----------	-------------------------------

Compound	Template
----------	----------

5-Membered	Aromatic Heterocycles
------------	-----------------------

Pyrroles

Furans

Thiophenes

Imidazoles

Pyrazoles

Oxazoles

Isoxazoles

Thiazoles

Isothiazoles

Triazoles-1,2,4

Triazoles-1,2,3

Oxadiazoles-1,2,5

Oxadiazoles-1,3,4

Oxadiazoles-1,2,4

Thiadiazoles-1,3,4

Thiadiazoles-1,2,5

Thiadiazoles-1,2,4

Tetrazoles

5-Membered

Fused Aromatic Heterocycles

Indoles and

carbazoles

Phthalimides

Isatines

Benzofurans

Benzothiophenes

Benzimidazoles

Benzopyrazoles

Benzoxazoles

Benzothiazoles

Benzotriazoles

Purines

6-Membered

Aromatic Heterocycles

Pyridines

Pyrimidines

Pyrazines

Pyridazines

Triazines-1,3,5

Triazines-1,2,4

6-Membered

Fused Aromatic Heterocycles

Quinolines

Quinazolines

Quinoxalines

Phthalazines
