

Activity-Aimed Sets are compound selections with target specific focus. The majority of the sets include TimTec active compounds featured in leading scientific publications. Each set is complemented with analogs selection to broaden chemical space around known structural material.

Currently available Activity-Aimed Sets:

[Anti-Infectives](#)

[Anti-Inflammatory](#)

[O-GlcNAc Transferase Inhibitors and Analogs](#)

[Aryl Hydrocarbon Receptor Ligands and Analogs](#)

[Activators of Neutrophils and Analogs](#)

[Inhibitors of Anthrax LF and Analogs](#)

[Potent TNF- \$\alpha\$ Inducers and Analogs](#)
