B1251-P - Siliconized

B1251-S - Sterile

1.1mL per well tubes

0.65mL per well tubes

These lightweight plates are perfect for organic samples storage for transportation in dry form or DMSO/other solvents suitable for polypropylene material. They work well under ambient or cold temperatures.

8-Cap Strip Covers for Plates (Plug Caps)

Recommended covers are tight 8-cap strip covers, non-sterile, catalog number, or silicone cap-mat, catalog number ... Strips are ideal for row-by-row covering and for half-filled with samples plates. They fit most of the plates designs. Strips can be cut easily to plug one or less than 8 wells. Each strip plug comes with a little side tab for easy removal.
