

Serine Proteinase Inhibitors Library collection, ActiTarg-S, includes small molecules-analogs to a group of serine proteinase inhibitors.

The following targets are considered for the molecular selection:

**Tryptase**  
**Thrombin    Elastase**  
**Proteasome**  
**Tripeptidyl peptidase**  
**Trypsin and trypsin-like proteases**  
**Various serine proteases, including granzymes**

ActiTarg-S currently includes about 900 analogs to known serpins. Compounds are available in dry form or in DMSO solution. Please contact us for database access and pricing.

### **Related Products**

ActiTarg-S is one of TimTec targeted libraries. Other targeted screening collections of interest are:

[ActiTarg-G](#) GPCR Ligands  
[ActiTarg-K](#) Kinase Modulators  
[ActiTarg-P](#) Protease Inhibitors  
[ActiTarg-I](#) Potassium Channel Modulators  
[ActiTarg-N](#) Nuclear Receptor Ligands  
[ActiTarg-H](#) HDAC Inhibitor    [ActiTarg-CNS](#) Central Nervous System Receptors Modulators
