

[TimTec Structure Search](#)

Enables to publish chemical data - structures, spectra as text and pictures over WWW. A client can select data with structure/substructure search and traditional text search. One may compare content of local SDF with remote database very fast - only 5 minutes are required to compare 1,000,000 structures from a remote database with 10,000 SDF chemical structures from a local database

Platform requirements: Windows 95/98/NT/XP/Vista/Win7
